

EZ Pedo: Ceramic Zirconia Crown

Your child has received an EZ pedo all Ceramic Zirconia Crown. This crown can become dislodged, fracture or get re-currant decay around or below the margins when improper home care or eating habits occur.

1. Routine brushing and flossing is required to prevent new decay.
2. Avoid hard and sticky foods such as: Caramels, taffy, ice, ect.
3. Sensitivity, swelling or irritation at the gum line where the crown is placed is a normal occurrence. Warm salt water rinses may help decrease these symptoms
4. Soft foods are advised for the rest of the day.
5. If needed pain reliever may be taken at home. Please follow the instructions given on the label.
